

## WHY CHOOSE SANDHURST?

### | Accountability

We really strive to live by our values with accountability at the top of our list. Accountability is everything to us – if we say we will do something by a certain time – then you can count on us doing just that.

### | Client Focused

We want to provide what is best for the client – not what's easiest for us. We will not ask you to fill out standard templates that do not work for you. We see it as a true partnership to provide exactly the product you require.

### | Trust

We believe trust is the bedrock of any relationship. We provide clear and transparent estimates with no hidden extras or dubious change orders.

### | Experience & Depth

All our facilitators have hands on real experience rather than just academic theory. The best facilitators are those who have done it themselves. We also make every effort to stay relevant and current by continuing to deploy to real incidents whenever possible.

### | Innovation

We are proud to be hands-on problem solvers and are constantly looking for new and more efficient ways of doing things. Our quick adoption of virtual training and exercises as well as other response tools has made us an industry leader in these areas.

### | Realistic Training

Exercises and training courses are more than just ticking the regulatory box to us. They are a way to bring the plans to life and prepare future responders for any eventuality by providing the most realistic training possible.

*“ The training around establishing a safety culture was the best I have seen in 25 years. ”*

*“ The Sandhurst approach to contractor management is both refreshing and effective. ”*

## CONTRACTOR MANAGEMENT

Sandhurst can be your partner in developing a contractor management program that will enable your organization to increase efficiency, reduced risks, and lead to successful project outcomes for the organization.

We understand that contractor management is a critical aspect to the safety of your operations. We'll work with you to monitor the performance of contractors to ensure they meet your standards and deliver quality work consistently.

Whether you have a new project coming on board, want to free up internal resources, or need help optimizing costs, Sandhurst can help you achieve your goals.

## WHEN SHOULD YOU CONSIDER CONTRACTOR MANAGEMENT?

When your organization seeks to:

- Mitigate potential risks associated with contractor performance, safety incidents, or project delays.
- Improve efficiencies by delegating contractor management tasks to experts.
- Standardize the evaluation process and ensure consistent quality across projects.
- Collect data on key performance indicators.

## WHEN SHOULD YOU CONSIDER SAFETY LEADERSHIP?

When your organization seeks to:

- Establish or reinforce safety as an integral part of your corporate culture and values.
- Expand the organization's expectations of leaders as to their role in delivering world class HSE leadership.
- Improve leaders' abilities to provide recognition to reinforce positive behaviour.
- Communicate to leaders how to set clear expectations for their team as to the standards required.
- Develop the coaching ability of leaders to allow them to bring their teams to the required standard.

## SAFETY LEADERSHIP

Without effective leadership, safety performance will be limited. Sandhurst develops and delivers individually tailored, best in class, Safety Leadership Training that will enhance your overarching Safety goals.

To be an effective safety leader, people need understand the context and be equipped with real world, practical tools to enable them to meet your safety goals.

Our Safety Leadership Training aims to ensure that your people are sufficiently equipped to implement effective safety leadership methods in the workplace. Our courses provide participants with the opportunity to apply these methods through experiential learning techniques.
